1. Summary at a glance

Area	Delivered	Partial	Not yet / not planned
Account & sign-in	Phone OTP, register, first-time profile	—	—
Search & listings	Browse (list + map), filters, property detail, enquiry	Some home-page links do not pre-set browse filters; saved favorites not offered	Full “My Favorites” experience
Post a property	All sectors and types in the matrix below; approval workflow	Some PDF field details (see Section 2); older listings use a simpler edit form	Items marked *Not planned* in Section 2
Services & loans	Service pages, forms, My Requests tracking	—	—
Service partners	Register, KYC, approval, leads, wallet, support, public profile	Masked Call customer only when platform calling is enabled	—
Property agents	Same listing form as owners; Leads; Reports	—	—
Staff review	Listings reviewed before go-live; rejection reason to owner	—	—

What the labels mean

- **Delivered** — Available on the test site today; main flow works.
- **Partial** — The flow works end-to-end, but not every detail from the PDF is matched (often covered in Section 2).
- **Changed from PDF** — We built something *different on purpose* from the PDF. See Section 2; this is not a defect.
- **Not yet** — Expected capability or PDF item not implemented; may be scheduled if you want it in scope.
- **Not planned** — Out of scope for this release (agreed or documented omission).

If something is **Changed from PDF**, treat it as an intentional difference—not a bug. Items under **Not yet** are candidates for a future release if you approve them.

2. Changes from your specification (PDF)

Your team shared three property form references: **Residential property PDF** (rent, resale, PG/hostel, flatmates), **Plot PDF**, and **Commercial PDF**. The table below lists where the live site **differs** from those documents.

Your PDF says	What we built	Why / note
Residential PDF: choose city first, then property category	Sector (Residential / Commercial / Land·Plot) and listing type first; city is entered in Locality details with the map	Same information is collected; order is simplified for a single national site
Residential PDF: separate top-level Lease listing type	Only rent or Only lease inside Residential → Rent	Lease is supported without a seventh top-level category
Residential PDF: full editable furnishing items list when semi/fully furnished	Small preset checklist (e.g. TV, Sofa)	Faster to post; a full catalog can be added if you require it
Residential PDF: Apartment name as a dropdown (flatmates)	Text field for society or apartment name	Works for any society without maintaining a master list
Residential PDF: gallery “upload through phone”, WhatsApp/email upload wording	Standard photo and video upload in the browser	Same outcome; different upload experience
Residential PDF: water supply with multiple options on some screens	Corporation (and similar limited lists) on some residential steps	Subset of PDF options; can be expanded to match screenshots
Plot PDF §6: sale deed, encumbrance, RERA status fields	Not shown on the form	Not planned for this release; only ownership and conversion certificate appear in Additional information
Plot PDF: visit schedule section	Not included	Matches the plot specification (schedule excluded there)
Commercial PDF: Ideal for / business-use matrix	Not shown	Not planned for this release
Commercial PDF: Schedule step (visit days and hours)	Contact preference (phone / WhatsApp / both) and contact availability; no day-by-day schedule screen	Visit scheduling simplified; full schedule step can be added if required
Commercial PDF: building type options depend on property type	One building type list for all commercial property types	Simpler form; dynamic lists can match the PDF if required
Platform: save listings to favorites	Not exposed in the main menu (favorites not a full feature)	Not yet — deferred
Marketing / home: browse links using “category”	Browse uses sector, rent/buy, and related filters	Some home-page links may not pre-filter; filters work on the Browse page itself

3. Platform features

Delivered

- **Sign-in and registration** with mobile OTP (customers and service partners).
- **Complete your profile** on first login: email, name, and full address (with optional “use current location”).
- **Public website:** home, about, contact, terms, list-your-property information, and service landing pages (home services, packers & movers, painting & cleaning, IT, events, job consultancy, general services, loans).
- **Browse properties:** list and map views; search and filters including sector and listing type where applicable; only **approved** listings are public.
- **Property detail:** photos, video, floor plans (when provided), map, description, amenities; signed-in users can **send an enquiry**.
- **My Listings:** step-by-step wizard to create a listing; edit and delete; status **Pending**, **Approved**, or **Reject ed** with a reason; email when approved or rejected.
- **My Requests:** track service bookings, loan applications, and consultancy requests in one place.
- **Service partners:** registration, business profile, document upload, verification, job leads, wallet, support tickets, alerts, and public partner page after approval.
- **Property agents:** post listings like owners; **Leads** for enquiries; **Reports** for activity summary.
- **Platform review:** tenant and agent listings are reviewed before they appear on the public site.

Partial

- **Saved favorites** — not offered as a dedicated “My Favorites” area in the menu.
- **Home-page browse links** — may not apply the same filters as the **Browse** page (see Section 2).
- **Listing cards** — new listings show category-appropriate highlights; **older listings** without a sector still show the classic layout (BHK, baths, area).

Not yet

- Full **favorites / saved properties** for tenants (if you want this in scope).
- Align all **marketing links** to open **Browse** with the correct filters pre-selected.

4. Property listings by type

New listings use: **Residential** (Rent, Resale, PG/Hostel, Flatmates), **Commercial** (Rent, Sale), **Land/Plot** (Resale). Cross-cutting fields: title, locality, map pin, price, photos, video, description (sq.ft for area), and **pen ding approval** for owners and agents.

Cross-cutting

Status	Items
Delivered	Wizard with Previous/Next; validation; gallery; map locality; approval workflow
Changed from PDF	Wizard order (city vs sector first); gallery upload UX — Section 2
Partial	Older listings: simpler edit form without sector/type

Residential — Rent

Status	Items
Delivered	Apartment / house / gated villa; BHK; floors or house floor count; property age; facing; built-up area; rent or lease; deposit; maintenance; preferred tenants; furnishing; parking; amenities; floor plans; rules for hiding floor fields on independent houses
Changed from PDF	Lease inside Rent; furnishing items checklist — Section 2
Partial	Water supply option list narrower than some PDF screens

Residential — Resale

Status	Items
Delivered	Standalone building type; ownership and lease years; built-up and carpet area; resale price and maintenance; kitchen; furnishing; parking; amenities; document questions (allotment, sale deed, property tax, occupancy); sale agreement when deed is No
Changed from PDF	Gallery upload — Section 2

Residential — PG / Hostel

Status	Items
Delivered	Room types (single–four) with rent/deposit per person and room amenities; PG details (male/female/anyone, guests, food); rules by audience; services and shared amenities; parking; gallery

Residential — Flatmates

Status	Items
Delivered	Room type; tenant type; property details; rent block; flatmate preferences; amenities; gallery
Changed from PDF	Apartment name as text, not dropdown — Section 2

Land / Plot — Resale

Status	Items
Delivered	Plot area; length/width; boundary wall; floors allowed; corner plot; gated project; facing; resale price; utilities; directions; ownership; conversion certificate; gallery
Not planned	Sale deed, encumbrance, RERA status — Section 2
Changed from PDF	No visit schedule — Section 2

Commercial — Rent and Sale

Status	Items
Delivered	Commercial property types (office, shop, warehouse, etc.); building type; age; floor and total floors; super built-up area; furnishing; on main road; corner; rent or sale pricing; deposit/ownership/possession as applicable; commercial amenities; description; contact preference
Changed from PDF	No ideal-for; simplified visit scheduling; static building types — Section 2
Partial	Full schedule step (preferred visit days/hours) not on the form

5. Service partners

Delivered

- Partner registration with business name and service categories.
- **Profile:** business details, service areas, working hours, portfolio photos and certificates.
- **Verification documents:** Aadhaar, PAN, and optional GST, business proof, address proof.
- **Verification status:** pending until approved; rejection reason when applicable.
- **Leads:** assignment, platform review, accept/decline, job updates and photos, complete job.
- **Wallet:** earnings and payout history when jobs are completed and amounts recorded.
- **Support** tickets and **Alerts**.
- **Public partner page** after verification (business info, locations, hours, showcase).

Partial

- **Call customer** — connects you to the customer through the platform without showing their private number on screen; available only when calling is enabled for the environment.

Changed from PDF

- Partner flows are not in the property PDFs; they follow the platform’s partner lifecycle above.

6. Property agents

Delivered

- Same **My Listings** and property wizard as property owners.
- **Leads** — enquiries tied to listings you manage.
- **Reports** — summary of your listing and enquiry activity.
- **My Requests** — if you book services for yourself or clients.

7. Not in this release

Do not treat these as defects unless you ask us to add them to scope:

- Plot **sale deed**, **encumbrance**, and **RERA** status fields (plot PDF).
- Commercial **ideal for** / business-use matrix.
- Commercial **day-by-day visit schedule** UI (contact preference/availability is used instead).
- **Full PDF gallery** flow (phone/WhatsApp upload prompts).
- **Full furnishing items** catalog (residential rent).
- **Saved favorites** in the main product menu.
- **Staff admin** screens (listing approval and partner operations are handled on the platform side, not in this document).

8. Suggested next priorities

If you want the site to match the PDFs more closely, these are the highest-impact items to confirm with us:

1. **Commercial visit schedule** — add preferred visit days/hours as in the commercial PDF.
2. **Plot certificate fields** — sale deed, encumbrance, RERA (with exact option lists you want).
3. **Furnishing items** — full editable list for semi/fully furnished rent.
4. **Saved favorites** — tenant bookmarking of listings.
5. **Browse links** — align home-page and marketing URLs with browse filters.
6. **Commercial building types** — options that change based on property type.
7. **Dynamic apartment name** — dropdown or search for flatmates if you supply a society list.

9. Documents to send

When sharing materials with your testers or stakeholders, we recommend:

Document	Format	Purpose
USER_GUIDE	PDF or Word	Step-by-step how to use the site
FEATURE_STATUS	PDF or Word	This file: done, partial, missing, and Section 2 PDF changes

Suggested email line: *“Section 2 of the feature status document lists differences from the property PDFs you shared; the rest shows what is live versus still to do.”*

Residential property PDF · Plot PDF · Commercial PDF — reference specifications provided for The YBDC property posting flows.
